

Carrier Research Services and Solutions

We value the trust and respect that we have earned from our customers; so after extensive searching, we have selected Dynamic Network Advisors as our Exclusive Carrier Solutions Partner. They represent all major telecom, cloud and data-center providers and their back-office staff represents decades of experience in all facets of the carrier world.

Because we know their business ethics, we are proud to have introduced them to many of our customers. They have provided creative and low-cost, high-value solutions for them.

Our Services

• Carrier Services

We use patented telecom pricing software to source products (T1, PRI, Cable, Internet, etc.) - show carrier prices, fiber routes and lit buildings from all of the major providers - in minutes, instead of days or weeks!

• Data Center Services

Using our interactive data-center map we can find data centers in any geography and determine which providers are available in each building.

• Cloud Services

It's never been easier to leverage enterprise class software and infrastructure. Let our cloud experts show you how to pay only for what you use by selecting from a range of cloud services.

• Telecom Billing Services

We provide a no cost, no-obligation review of all telecom bills and present a detailed report identifying all billing errors. Further options include ongoing management of both wireline and wireless services.

Our Process

We become your single point of contact and an unbiased, NO-COST Carrier Consultant

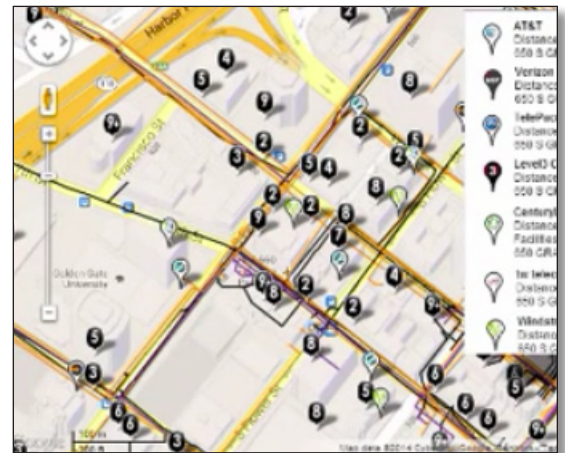

Discover - Our team of experts will ensure that they fully understand your business and then, using patented software, identify all available services and providers and make appropriate and unbiased recommendations.

Design - Our carrier-neutral engineers then design the solutions that meet or exceed your needs.

Negotiate - We then negotiate pricing and appropriate agreements with the selected providers.

Implement - The project management team oversees the provisioning process with the carriers, vendors and client point of contact.

Support - We provide ongoing engagement to facilitate carrier escalations, trouble tickets and MAC orders.

Our proprietary software includes up-to-date fiber maps that allows us to find which carriers provide which services at any address in the U.S. in minutes.
